

Senior Developer - .Net

Job Family: Architecture, Development & Integration

Job Level: Senior Developer - .Net

Technology: .NET, MVC, Web API, SOA, & T-SQL

Job Summary

MVC, Entity Framework, and .Net Core. Under the direction of the team lead and architect, the Senior Developer will be involved in all development lifecycle phases, from inception through delivery. These responsibilities include designing, developing, testing, and deploying portals and web services in complex, cross-system solutions.

This is primarily a remote role with an occasional need to be in the office. As such, a proactive and self-motivated personality is a must. The ideal candidate will also be able to provide Tier-3 application support for legacy applications, have a working knowledge of Microservices and SOA, and have a solid understanding of Microsoft SQL Server.

Primary Responsibilities

- Design, develop, and maintain software applications using WebAPI, MVC, Entity Framework, and .Net Core
- Ensure the software is reliable, scalable, and secure
- Provide technical leadership to other developers and stakeholders
- Work with the team to adhere to and continuously improve software development processes
- Participate in design discussions to provide the best UI/UX experience to end users
- Reviewing current systems along with new code written by other team members
- Present ideas for technology and process improvements
- Work closely with QA, PMs, architects, and other team members
- Test solutions in controlled, real-world situations before going live
- Troubleshoot and resolve Tier-3 technical issues related to the applications

Skills

- Strong understanding of MVC .NET utilizing C#
- Strong understanding of HTML, CSS, and JavaScript frameworks
- Experience with MS SQL Server or other types of T-SQL is a plus
- Working knowledge of design patterns and cybersecurity practices
- Familiarity with web services, including SOA, OData, and microservices, is a plus
- Strong analysis and troubleshooting skills
- Good oral and written communication skills

- Ability to work independently and as part of a collaborative team
- Willingness to learn and acquire new skills
- Incredible attention to detail

Experience, Education, and Certifications

- **Required Experience:** 5+ years of experience delivering technology solutions utilizing .NET
- **Required Education:** Bachelor's Degree in Computer Science or a related field

*College or university must be sufficiently accredited and listed in the U.S. Department of Education Accreditation Directory.
